

Climate Adaptation for Coastal Communities

October 1 – 3, 2013 ♦ 9:00 am – 5:00 pm

Day 1 & 2: The San Diego Foundation, 2508 Historic Decatur Road, San Diego, CA 92106

Day 3: Tijuana Estuary Training Center, 301 Caspian Way, Imperial Beach, CA 91932

Course Description: This intensive and highly interactive three-day training course provides individuals with a climate adaptation toolkit to proactively address adaptation planning in the context of local priorities. The course is taught by NOAA Coastal Services Center's expert training staff and local partners.

After completing this course, participants will be able to:

- *Recognize* the changes and variability in climate, and its influence on coastal communities
- *Examine* methods for conducting hazard, vulnerability, and risk assessment as it relates to climate change
- *Evaluate* the strengths and weaknesses of adaptation strategies
- *Communicate* effectively with target audiences
- *Identify* opportunities to leverage a range of governance mechanisms to integrate adaptation strategies into existing efforts

Who should attend? Professionals interested in: (1) increasing their understanding of, and skills in, climate adaptation planning, and (2) networking among other professionals involved in climate change efforts. Specifically: program administrators, land use planners, public works staff members, floodplain managers, hazard mitigation planners, emergency managers, community groups, members of civic organizations, and coastal resource managers.
