

Teachers on the Estuary

at the Tijuana River National Estuarine Research Reserve
Thursday, May 18th - Friday, May 19th
8:30am - 4:30pm each day
Designed for middle and high school teachers

Teacher Testimonial:

"Being able to give my students a Nature/ Field experience is vital to fire their passion for Biology and Conservation. It's one thing to read about wetlands in a text book, or see a video; when they get the chance to visit a real wetland and "get their hands dirty" really doing field techniques makes it exponentially more valuable."

- Stuart Douglas, Granger Junior High, National City, CA

Teachers on the Estuary (TOTE) is a field-based teacher training program that brings coastal research into the classroom.

At this training you will:

- see and experience science being done at the Tijuana River NERR and learn how you can use it to enhance your teaching.
- interact with Reserve researchers, visit wetland restoration sites, and see the long-term monitoring that is used to manage these projects (living experiments).
- find out how to integrate your training experiences with online nationwide Reserve data and our monitoring-based field trip lessons.

Reserve your spot Today!
