

# Tijuana River National Estuarine Research Reserve

## Saturday Speaker Series

Saturday, April 15th: 10:00 - 11:00 a.m.

## The Secret Life of the Salt Marsh Bird's Beak

**NEXT TALK 6/17:**  
The Parasites in Our  
Wetlands....Yikes!

- Dr. Ralph Appy

Contrary to what you might think, salt marsh bird's-beak (*Chloropyron maritimum* spp. *maritimum*) is actually a highly endangered plant, not part of a bird's anatomy. Come get an inside look at this plant with Biologist Sally Trnka: find out where this plant grows in the marsh, its unique relationship with native bees, and local efforts to study and restore this plant.
