

Tijuana River National Estuarine Research Reserve

Saturday Speaker Series

Saturday, April 20th: 10:00 - 11:00 a.m.

Coastal Pollution Transport:

What Impacts the Spreading of Pollution Along our Coastline?

Sarah Giddings, Ph.D, Scripps Institution of Oceanography

NEXT TALK 6/15:

Why did the Tijuana River mouth close in 2016?

- Bonnie Ludka, SIO

Coastal pollution remains a threat to human health across beaches worldwide. What dynamics determine the ultimate fate of coastal pollutants and exposure pathways for humans? How can we better predict beach water quality?

Here we will show results from the CSIDE (Cross Inner-shelf/Surfzone Dye Exchange) project examining exchange between coastal estuaries, the surfzone, and the coastal ocean to address these issues in Southern San Diego County and beyond.
