**Questions:** [annemarie.tipton@parks.ca.gov](mailto:annemarie.tipton@parks.ca.gov), 619.575.3613 x304

**Location:**  
**Thursday & Friday:** San Diego Coast State Parks District Office  
 4477 Pacific Highway, Training Room, San Diego, CA 92110  
**Saturday:** Tijuana Estuary Visitor Center  
 301 Caspian Way, Imperial Beach, CA 91932

**Teachers on the Estuary (TOTE)** is a field-based teacher training program that brings coastal research into the classroom.

At this training you will:

- model the NGSS learning process by using the phenomenon of sea level rise as the basis for meaningful learning experiences for students;
- use local tide level data, as well as El Niño data, to form the foundation of instruction;
- be introduced to climate related student field experiences;
- **kayak in Mission Bay** to learn about the ReWild salt marsh restoration;
- gain strategies to help ensure students' emotional/psycho-social resilience to climate change impacts; and
- hear from an inspirational panel so that you can empower your students to engage in San Diego's active climate movement.
