PROFESSIONAL CERTIFICATION

PHASE I ENVIRONMENTAL SITE ASSESSMENT

Property Located at:

Nelson Sloan Quarry Property
San Diego, CA 92154

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professional as defined in § 312.10 of this part.

We have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the subject property. We have developed and performed the all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

Prepared by:

Signature
Michael Wolff

Registered Professional Geologist (Calif. PG-3347)
Certified Engineering Geologist (Calif. CEG-970)

Vice President

STATEMENT OF LIMITATIONS

The services described in this document were performed in a manner consistent with the agreement with the client and in accordance with generally accepted professional consulting principles and practices.

Opinions and recommendations contained in this document apply to conditions existing at certain locations when services were performed and are intended only for the specific purposes, locations, time frames, and project parameters indicated. We cannot be responsible for the impact of any changes in environmental standards, practices, or regulations after performance of services.

Any use or modification of this document by a third party is expressly prohibited without a written, specific authorization from the client and author(s). Such authorization will require a signed waiver and release agreement.

This document is issued with the understanding that the client, the property owner, or its representative is responsible for ensuring that the information, conclusions and recommendations contained herein are brought to the attention of the appropriate regulatory agencies, as required.

1.0 Executive Summary

Kroner Environmental Services, Inc. (KES) performed a Phase 1 Environmental Site Assessment (ESA) for a portion of the Nelson Sloan Quarry property (the “site” or “subject property”) in the southwest of the County of San Diego. This ESA supports the Nelson Sloan Quarry Restoration Project. Ultimately, for the restoration project, excess sediment extracted from flood control facilities maintained by California State Parks, the City of San Diego (City), the County of San Diego (County), and United States International Boundary and Water Commission (IBWC) that is currently hauled offsite to area landfills, or construction projects, would instead be hauled to the Nelson Sloan Quarry for processing and placement to restore the quarry to natural landform and habitat. However, this ESA only assesses the present condition of the subject property with respect to contaminants within the scope of the Comprehensive Environmental Response Compensation and Liability Act (CERCLA) and petroleum products. The subject property is located south of Monument Road along the U.S. - Mexico international border in the Tijuana River Valley. The site location is shown on Figure 1. Figure 2 following the text shows the vicinity map, and Figure 3 shows the site map. The vicinity map is also included as Appendix A and the site map is also included as Appendix B in conformance with the American Society for Testing and Materials (ASTM) Practice E 1527-13 recommended outline for Phase 1 environmental site assessments.

The ESA was performed in general accordance with ASTM Practice E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 11 of this report.

The assessment revealed several sites with potential environmental concerns within the prescribed ASTM search distances. Detailed evaluation of these sites permitted narrowing the number of sites that posed realistic potential concerns to the subject property to just a few. Further evaluation of records, a site inspection, and interviews with knowledgeable persons resulted in identifying no recognized environmental conditions (RECs) that meet the definition of the term in the ASTM Practice.

As a result, this assessment has revealed no evidence of recognized environmental conditions in connection with the property.
Figure 1
Site Location
Phase 1 Environmental Site Assessment  
Nelson Sloan Quarry Property

2.0 Introduction
This report presents the results of a Phase 1 Environmental Site Assessment (ESA) of the property described as:

Nelson Sloan Quarry Property

The planned restoration area within the property boundaries is referred to throughout this report as the “site” or “subject property.” The site location is shown above on Figure 1. Figure 2 presents a vicinity map (also included as Appendix A), and Figure 3 is the site map (also included as Appendix B). The specific focus area of this ESA is highlighted in red on Figure 2.

The ESA was performed in accordance with ASTM Practice E 1527-13. The organization of this report follows the suggested outline given in E 1527-13. Section 11 - Deviations, includes a table that lists specific requirements and recommendations of the Practice, and identifies any deviations in this ESA. ASTM Practice E 1527-13 provides considerable latitude for exercise of professional judgment on the part of the environmental professional conducting the ESA; thus, not all aspects of the Practice will necessarily apply in every ESA. Section 11 presents a discussion of the reason for, and potential significance of, each deviation, if any.

Sections 3 through 7 present discussions of the information collected in the ESA. Section 8 presents findings resulting from evaluation of the information. Findings primarily include a listing of environmental conditions (current as well as historical) that are associated with the subject property, as well as with other properties that could affect the subject property.

Section 9 – Opinion, includes an evaluation by the responsible environmental professional of the impact on the property of known or suspected environmental conditions identified in the findings section. Section 9 presents the environmental professional’s rationale for including or excluding current or historical environmental conditions as recognized environmental conditions (RECs) as defined in the Practice. Section 10 – Conclusions, lists the RECs for the property, if any.

2.1 Purpose
The primary purpose of this Phase I ESA was to identify any RECs associated with the subject property. The term “recognized environmental conditions” is defined by ASTM Practice E 1527-13 as: “the presence or likely presence of any hazardous substances or petroleum products on a property under conditions that indicate an existing release, a past release, or a material threat of a release of any hazardous substances or petroleum products into structures on the property or into the ground, groundwater, or surface water of the property. The term includes hazardous substances or petroleum products even under conditions in compliance with laws. The term is not intended to include de minimis conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.”

RECs may include historical recognized environmental conditions (HRECs), and/or controlled recognized environmental conditions (CRECs). HRECs are past historical conditions that may or may not still qualify as RECs at the time of the Phase I ESA. CRECs are RECs that are being controlled either by active engineering controls, or by passive engineering or institutional controls. An example of the latter would be land use restrictions.
Finally, RECs may include vapor encroachment conditions (VECs) determined in accordance with a Tier 1 screening process described in ASTM Standard E2600-15 - Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions.

Another purpose of this Phase I ESA was to constitute all appropriate inquiries (AAI) for purposes of the Comprehensive Environmental Response Compensation and Liability Act of 1980 (CERCLA) landowner liability protections. For a definition of all appropriate inquiries please refer to ASTM Practice E 1527-13 and 42 United States Code (USC) §9601(35)(B). Qualified legal counsel should be consulted for an in-depth evaluation of the CERCLA landowner liability protections.

2.2 Detailed Scope of Services
The scope of services was to perform a Phase I ESA in accordance with ASTM Practice E 1527-13. Any limitations or exceptions are listed in Section 2.4. Deviations from ASTM E 1527-13, if any, are listed in Section 11.0.

2.3 Significant Assumptions
Significant assumptions made in this Phase I ESA are as follows:

- Information provided by the client is accurate,
- Information provided in interviews is truthful,
- Information in public records accessed for the assessment is accurate,
- The property use during time periods between historical data points (e.g. historical aerial photographs, etc.) was consistent with that evident in the historical information,
- No information was concealed or withheld that would change the report conclusions.

2.4 Limitations and Exceptions
The following limitations apply to this Phase I ESA:

- The data in this report were derived primarily from a site visit, review of records in the public domain, and interviews with individuals having information about the site. The passage of time, manifestation of latent conditions, or occurrence of future events may require further exploration at the site, analysis of the data, and reevaluation of the findings, observations, and conclusions in the report.
- The findings, observations, and conclusions in this report are not, nor should they be, considered an opinion concerning the compliance of any past or present owner or operator of the site with any federal, state, or local laws or regulations.
- No warranty or guarantee, expressed or implied, is made with respect to the data reported, except as specifically provided for in the contract for the work. Findings, observations, and conclusions are based solely upon site conditions in existence and readily-available data at the time of this assessment.
- This Phase I ESA report presents professional opinions and findings of a scientific and technical nature. While attempts were made to relate the data and findings to applicable environmental laws and regulations, the report shall not be construed to be a legal opinion.
Phase 1 Environmental Site Assessment
Nelson Sloan Quarry Property

as to the requirements of, or compliance with, environmental laws and regulations. Issues raised by this report, if any, should be reviewed by appropriate legal counsel.

- The conclusions presented in this report are professional opinions based on data described in this report. They are intended only for the client-specific purpose, site location, and project indicated. This report is not a definitive study of contamination at the site and should not be interpreted as such. An evaluation of subsurface soil and groundwater conditions was not performed as part of this assessment. No sampling or chemical analyses of site soils or structural materials were performed.

2.5 Special Terms and Conditions

There were no special terms and conditions applicable to this ESA.

2.6 User Reliance

The term User is defined in ASTM E 1527-13 as “the party seeking to use Practices E 1527 or E 1528 to perform an environmental site assessment of the property. A user may include, without limitation, a purchaser of property, a potential tenant of property, an owner of property, a lender, or a property manager.”

ASTM Practice E 1527-13 also prescribes time limitations for reliance on Phase I ESAs. In general, the results of a Phase I ESA conforming to the Practice may be relied upon for a period of 180 days. Following this date, certain elements of the ESA must be updated for the ESA to be relied upon.

For this report, the term User refers to the group of interested parties including the client who commissioned this report, and any lenders, developers, potential tenants and others who together constitute the stakeholders of the client’s team, and who the client determines have a valid need for the information in this ESA. These parties may rely on the results of the ESA to the extent, and within the time limits, prescribed by ASTM E 1527-13. Other parties rely on the findings of this Phase I ESA at their sole risk.

For this report, the term User does not include subsequent potential property purchasers, their lenders or prospective tenants, who did not participate in the commissioning of this report, and are not involved in the present transaction concerning the property that prompted the ESA. Such subsequent parties shall rely on the results of the report at their sole risk.
3.0 Site Description

A portion of the Nelson Sloan Quarry, is an appropriately 70-acre property located in the southwest portion of the County of San Diego, State of California. Within that area, the Project will include reclamation activity in approximately 40-acres within the site. It is located within the Tijuana River Valley Regional Park (Figure 2-3).

Site photographs of the site are presented in Appendix C.

3.1 Location and Legal Description

Project activities would occur in the following Assessor Parcel Numbers (APNs), which are owned and operated by San Diego County:

- 664-011-05-00
- 664-011-04-00
- 664-011-03-00
- 664-020-04-00

These four APN’s were included in the public record review described later in Section 6.0 as part of the site.

3.2 Site and Vicinity General Characteristics

Generally, the subject property is currently undeveloped aside from previous quarrying operations and remaining dirt access roads and trails at the top of the mesa and base of the slope (Figure 2).

3.3 Current Use of the Property

Currently, the subject property is vacant and a portion is used by Customs and Border Protection (CBP) to patrol the area along the border fence on the U.S. – Mexico international border. The dirt access roads and smaller dirt trails onsite are also used for hiking and as equestrian trails managed by the County of San Diego.

3.4 Description of Structures, Roads, Other Improvements on the Site

On site improvements include the dirt access roads and trails.

Site Photographs are provided in Appendix C.

3.5 Current Uses of Adjoining Properties

The land surrounding the project site includes recreational use, multi-habitat planning area, single-family residential, and industrial uses. This site is located within the southeastern corner of Tijuana River Valley Regional Park and abuts Monument Road to the east.

On the east side of Monument Road, about one quarter mile east of the project site boundary, is the City of San Diego’s South Bay Water Reclamation Plant. Immediately east of the South Bay Water Reclamation Plant is an active construction site for a new U.S. Customs and Border Protection (CBP) facility. To the immediate east of the CBP site is the United States International Water and Boundary Commission’s (IBWC) South Bay International Wastewater Treatment Plant.
The project site is bordered by federal lands managed by US CBP to the south, and by County of San Diego Park lands to the west and north. The Tijuana River Valley Regional Park ranger station complex is about 600 feet northeast of the subject site and is the nearest structure. The elevated vantage point provided by the mesa is occasionally used by CBP for visual surveillance of the border fence and surrounding area. Beyond the County lands, beginning about one-third mile to the northwest of the project site boundary are several residences, horse stables, agriculture, and a feed supply store.

Adjoining properties can generally be differentiated by their relative direction from the planned construction areas (subject property), and are described in the following table and are shown in Figure 2:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

Appendix C includes photographs of surrounding properties and uses.

### 3.6 Proposed Improvements

The Nelson Sloan Quarry Restoration Project consists of the beneficial re-use of excess sediment deposited in flood control facilities, and natural habitats, in the Tijuana River Valley towards the restoration of the Nelson Sloan Quarry. More specifically, excess sediment extracted from flood control facilities and currently hauled offsite to area landfills, or construction projects, would instead be hauled to the Nelson Sloan Quarry for processing and placement to restore the quarry to natural landform and habitat.
4.0 User Provided Information
This section discusses information provided by the client, if any, relevant to the goals of the ESA. In the absence of information provided by the client, some information for third-party sources were utilized to complete this section.

4.1 Title Records
A Preliminary Title Report generated by EDR was provided for review and included. The Preliminary Title Report included the four APNs which compose the subject property (664-011-05-00, 664-011-04-00, 664-011-03-00, and 664-020-04-00). However, the preliminary report was limited. Recorded land titles are records usually maintained by the municipal clerk or county recorder of deeds which detail ownership fees, leases, land contracts, easements, liens, deficiencies, and activity and land use limitations (AUL) attached to or recorded against the subject property within the local jurisdictions having control for or reporting responsibility to the subject property. Due to state land trust regulations and laws, land title records will often only provide trust names, bank trust numbers, owner’s names, or easement holders, and not information concerning previous uses or occupants of the subject property. Additionally, environmental liens recorded against the subject property are, at times, considered outside the scope of recorded land title records. For these reasons, this ESA has relied upon other standard historical information sources assumed to be either more accurate or informative than recorded land titles.

4.2 Environmental Liens or Activity and Use Limitations
The Preliminary Title Report provided by EDR does not disclose the existence of any recorded environmental liens or other activity and use limitations (AULs). The Preliminary Title Report included the four APNs which compose the subject property (664-011-05-00, 664-011-04-00, 664-011-03-00, and 664-020-04-00).

4.3 Specialized Knowledge
The client has not reported any specialized knowledge of any environmental issues that might affect the property.

4.4 Valuation Reduction for Environmental Issues
The client has not reported knowledge of any valuation reduction for environmental issues affecting the property.

4.5 Owner, Property Manager and Occupant Information
The parcels directly affected by project construction activity, 664-011-05-00 and 664-011-04-00, are under ownership of the County of San Diego and operated by the Department of Parks and Recreation. The remaining two parcels, 664-011-03-00 and 664-020-04-00, are also owned by the County of San Diego. As specified in the City’s 1982 Conditional Use Permit (CUP), minor sand and gravel extraction activities have been occurring on the site since the 1930's without permit. Under the Tijuana River Valley Plan, the “Border Highlands” area, including the subject site, was designated for “commercial-recreation” use. To reconcile the potential of the area as a sand and gravel resource with the goal of preserving the natural habitat, the California State Coastal Commission eventually certified the Local Coastal Program Addendum in September 1979, which recommended a plan for specific guidelines for the phased extraction and
subsequent reclamation of sand and gravel resources in the area. This Precise Plan was certified in July 1981. The City granted the 20-year CUP for sand and gravel extraction to Nelson & Sloan in April 1982 (Appendix K). In 1988, during this CUP, ownership of the subject site was granted to the County of San Diego Parks and Recreation Department.

4.6 **Reason for Performing Phase I**

This Phase I ESA was performed in support of the planned quarry restoration to natural habitat at the subject property.

As stated in Section 2.1, the primary purpose of this Phase I environmental site assessment (ESA) was to identify any recognized environmental conditions (RECs) associated with the subject property. The term “recognized environmental conditions” is defined in Section 2.1.

Another purpose of the Phase I ESA was to constitute *all appropriate inquiries* for purposes of CERCLA’s *innocent landowner defense*. For a definition of *all appropriate inquiries* please refer to ASTM Practice E 1527-13. Qualified legal counsel should be sought for an in-depth evaluation of the CERCLA *innocent landowner defense*.
5.0 Records Review

This section discusses information collected from reasonably ascertainable and practically reviewable sources. The terms reasonably ascertainable and practically reviewable are defined in ASTM E 1527-13. For this Phase I ESA, records were obtained from a database vendor, Environmental Data Resources, Inc. (EDR). EDR’s Corridor Report is included as Appendix D.

5.1 Standard Environmental Record Sources

EDR provided information from standard and proprietary record sources. Search distances met or exceeded ASTM guidelines. A summary of the number of sites identified in the EDR report, along with their distances from the subject property, is given in the following table.

<table>
<thead>
<tr>
<th>Database</th>
<th>Search Distance (Miles)</th>

*Note that the databases do not properly label this site as subject property because there was no associated address, but mapped on site and shown at a distance of 0.0 miles from SP.

5.2 Additional Environmental Record Sources

According to ASTM E 1527-13, Section 7.1.4.2, information that has been requested must be reasonably ascertainable as part of performing the Phase I ESA. Information that is reasonably ascertainable per ASTM means that information will be provided by the source within 20 calendar days of receiving a written, telephone, or in-person request. While the results of the database search did not indicate that any information would be on file for the subject property at any public agencies with responsibility for environmental regulation or permitting, environmental regulatory agency contacts were made as follows:

City of San Diego

On April 19, 2019, KES contacted the City of San Diego Public Records through their online portal, requesting records for any building permits or violations within the four County-owned parcels in or adjacent to the project:

- 664-011-05-00
- 664-011-04-00
- 664-011-03-00
- 664-020-04-00

On May 5, 2019, the City responded, providing one building permit for a single-family residence at 3245 Monument Rd from April, 1962. The home no longer exists, and the land is now part of the Tijuana River Valley Regional Park, in the northeastern corner of the project site.

Department of Toxic Substances Control

On April 19, 2019, KES searched the California Department of Toxic Substance Control’s EnviroStor resource for any records of cleanup, permitting, or investigation efforts of hazardous waste sites with known or suspected contamination issues within the same four parcels in or adjacent to the project. No records of cleanup sites or permitted facilities were found. A follow-up phone call made on the same date also resulted in no records of cleanup sites or permitted facilities.

San Diego Regional Water Quality Control Board (District 9)

On April 19, 2019, KES reviewed relevant properties to the subject site using the RWQCB’s GeoTracker online resource for groundwater and environmental data. Two properties within one-mile approximate minimum search distance from the site were listed as Cleanup Program Sites and were identified for further review.

The case at 200 N Monument and Dairy Mart Rd was opened in September 1991 as a waste oil spill on the property of a GTE, Inc. facility. The case was closed by RWQCB in December 1998 during the planning stage of the South Bay Water Reclamation Plant development on the property. Historic aerial site photos indicate that development of the property began in early 2000.
The County of San Diego Department of Environmental Health (DEH) reported that the case at 3225-3245 Monument Rd was opened in 1992 after a complaint of dumping chemicals and wastes on the vacant property. The wastes were removed and confirmation soil and groundwater sampling were directed by DEH. The site was then planned and developed as the International Wastewater Treatment Plant. During the planning stage for this development, in February 1994, the case was referred to the oversight of the Regional Water Quality Control Board (RWQCB) by DEH. The case was closed on September 26, 2012, when the RWQCB confirmed to DEH that the case has been resolved.

KES submitted a public records request to the San Diego Regional Water Quality Board, District 9, on May 6, 2019 for discharge records at properties adjacent to the subject site. Specifically, KES inquired about the two addresses listed as leak closures in GeoTracker at GTE, Inc. and the Hofer Property. On May 7, San Diego RWQB responded that, other than the information listed on GeoTracker, a set of microfiche slides for the properties were available for viewing at the office. Due to the closure of the sites and availability of online records, an in-person viewing of the files was deemed unnecessary. Additionally, as discussed above in Section 5.1, the distance from the subject property and topographic gradient made additional records review unnecessary.

5.3 Physical Setting Sources

Based on the USGS Imperial Beach, California Quadrangle, dated 2012, the subject property topography ranges from approximately 100 to 340 feet above mean sea level and slopes downward to the north, northwest (USGS). The terrain of the site consists of coastal highlands, with finger canyons extending north, down to Tijuana River Valley. The project site is vacant and is crossed by several dirt roads and paths. An irrigation system and disturbance associated with previous staging and soil/sediment stockpile areas is visible in the eastern portion of the site. There are no structures located on site. The terrain surrounding the project site consists of rolling hills and ridges, and vegetation is limited mostly to low-lying shrubs and some small trees. Designated recreational lands (Tijuana River Valley Regional Park) border the north and west sides of the site and include a network of recreational trails.

A physical setting map for the site vicinity is provided as a part of the EDR report in Appendix D.

5.4 Historical Use Information on the Property

5.4.1 Historical Aerial Photograph Review

Historical aerial photographs were obtained from EDR and were studied and evaluated for potential evidence of historical activities on the subject site or nearby sites that might suggest potential environmental concerns. Historical aerial photographs are presented in Appendix E. The following summarizes observations from the aerial photographs.

The historical photographs for the subject site indicate that the site remained mostly undisturbed, other than a network of unpaved paths, through 1970. A 1979 aerial photograph shows visible land disturbance in the southeastern portion of the subject site, related to the sand and gravel extraction operation as mentioned in the City’s CUP, discussed in Section 4.5 above.

5.4.2 Historical Topographic Map Review

Historical topographic maps were obtained from EDR and were studied and evaluated for potential evidence of historical activities on the subject site or nearby sites that might suggest potential environmental concerns. Historical topographic maps are presented in Appendix F. The
1904 topographic map shows a small, unidentified structure in the northern portion of the subject property at the end of short road spur. The 1930 topographic map shows a road cutting diagonally across the subject property from the northwest to southeast. The only significant changes in the site topography occur between the 1975 and 1991 editions, during which the terrain at the southeast corner of the project site had been lowered and levelled as the hill was excavated for sand and gravel. The “pit” became deeper and more pronounced by the 1996 edition. No topographical difference was visible between the 1996 and 2012 editions. Note that the Nelson & Sloan Conditional Use Permit for sand and gravel extraction expired in 2002.

5.4.3 Historical Fire Insurance Map Review

Sanborn insurance maps were researched but none existed for subject property.

5.4.3 Historical City Directory Review

A city directory abstract was obtained from EDR and reviewed. A copy of the city directory abstract is provided in Appendix G.

5.5 Historical Use Information on Adjoining Properties

Information on historical uses of properties adjoining the subject property is summarized in the following table.

5.6 Environmental Liens

A search for environmental liens was conducted by EDR, and none were found. A copy of the EDR environmental lien report is included as Appendix H.
6.0 Site Reconnaissance

6.1 Methodology and Limiting Conditions

6.1.1 Methodology
The property was visited by Alex Grant of KES on April 24, 2019. All areas of the property were accessible except for any areas identified in Section 6.1.2 below. All areas were walked and visually examined for signs of potential environmental concerns. Photographs were taken and are presented in Appendix C. Types of features of potential concern are listed in the tables in Sections 6.3 and 6.4 below along with an indication of whether or not any such features were observed. The site perimeter was also walked and observed for the purpose of identifying any areas where conditions on adjoining sites might impact the subject property, or, any areas where conditions on the subject property might impact adjoining properties.

6.1.2 Limiting Conditions
All exterior areas of the subject property were accessible. However, the southern edge of the property is bounded by the U.S. – Mexico International Border limiting access to adjoining property to the south. Site photographs were permitted.

6.2 General Site Setting
The subject property is located south of Monument Road along the U.S. - Mexico international border in the Tijuana River Valley. The terrain of the site consists of coastal highlands, with finger canyons extending north, down to Tijuana River Valley. The project site is vacant and is crossed by several dirt roads and paths. An irrigation system and disturbance associated with previous staging and soil/sediment stockpile areas is visible in the eastern portion of the site. There are no structures located on site. The terrain surrounding the project site consists of rolling hills and ridges, and vegetation is limited mostly to low-lying shrubs and some small trees. Designated recreational lands (Tijuana River Valley Regional Park) border the north and west sides of the site and include a network of recreational trails.

6.3 Exterior Observations
The following table lists details of site reconnaissance observations for exterior portions of the property.

### 6.4 Interior Observations

No interior site reconnaissance was performed. No structures onsite.
7.0 Interviews

7.1 Interview with Owner

The subject site is owned by the County of San Diego and managed by the Department of Parks and Recreation as part of the Tijuana River Valley Regional Park. An interview with a County representative, Josh Bugiel, is included below.

Questions/Responses:

1. How long have you owned or worked at this property?
   
   The County has owned the park since 1988 and I have personally worked here for approximately 5 years.

2. What are the main operations that occur on this property?
   
   Safety Patrols from County Staff and patrols from the U.S. Border Patrol.

3. What are the main tenant operations that occur at this property?
   
   Patrols for Border Security and Enforcement, and Multi-Species Conservation Plan site.

4. What other operation or activities were historically performed at this property?
   
   Former Sand and Gravel Quarry.

5. What other tenant operation or activities were historically performed at this property?
   
   Multi-Species Conservation Plan site.

6. What operations occur at properties adjacent to this property?
   
   Border Patrol operations and City Water Reclamation Plant.

7. What operations historically occurred at properties adjacent to this property?
   
   Historically the valley has been known for its history of agriculture land use.

8. Are you aware of any spills or hazardous materials activities at this property?

   No.

9. Are you aware of any spills or hazardous materials activities at properties adjacent to this property?

   The International Water and Boundary Commission (IBWC) treatment plant reports of sewage spills out of Mexico.
10. Are you aware of any underground or above ground storage tanks located or used at this property?

No.

11. Are you aware of any underground or above ground storage tanks located or used at adjacent properties?

No.

12. Can you recommend any other people available for interview who may have knowledge of the property and the above referenced issues?

No.

Additionally, KES attempted to contact Mr. Mike Verderber, supervising Park Ranger of Tijuana River Valley Regional Park, for an in-person interview during the site visit on April 24 and 25, 2019, at which time he was unavailable. KES then contacted Mr. Verderber via email on April 26 and May 9 but did not receive a response. In the absence of Mr. Verderber’s interview, KES has still accumulated adequate information on historic and present land uses and contamination potential from the interview with Mr. Bugiel and the review of public records as documented below in Section 5.

7.2 Interview with Site Manager
See 7.1 above.

7.3 Interviews with Occupants
See 7.1 above.

7.4 Interviews with Local Government Officials
Inquiries were made for potential local government interviewees during the public agency and government records search process described above in Section 5.2, however, no potential interviewees were identified or conducted.

7.5 Interviews with Others
No other persons with knowledge of environmental conditions at the property were identified for interview during the course of this Phase I ESA.
8.0 Findings

The environmental database search and records review produced a total of 10 sites with environmental records of various types within the prescribed ASTM search distances. However, review of the records revealed that these sites pose either no environmental concern, or de minimis environmental concerns, for the subject property. The evaluation also included a review of the closest sites to the subject property that either had recorded releases, handled hazardous materials or waste, or had operations that might raise concerns regarding spills, leaks, or other releases of chemicals of environmental concern to the subject property. These sites are identified and discussed in Section 5.1.

While the Nelson & Sloan Quarry operated for many years on the subject property, the presence of gravel and sand mining alone does not warrant designation as a medium or high probability source of impact to the subject property. This type of mining operation does not typically require the use of significant quantities of hazardous materials and, while it is possible there were undocumented fuel tanks onsite for mining equipment, it is also possible that the equipment was fueled from mobile tankers dispatched to the site. There are no records, interviews, or other physical signs indicating their presence or any releases of petroleum products onsite. Interviews indicated some sewage releases from Mexico to Tijuana River, however, topographic gradient and physical distance from subject property means that these releases pose no more than a low probability of impacting the site.

The DTSC generally recommends soil sampling of quarries when the quarry product is to be used as imported fill at another site. This is because some rock quarries contain rock with naturally-occurring minerals that may potentially pose concerns for the importing site, such as elevated heavy metals such as arsenic or lead, or concentrations of natural asbestos (serpentine). These conditions generally are not concerns in sand and gravel deposits unless they are situated close to source rocks known to be rich in these minerals. This is not thought to be the case for the subject site based on the site inspection and no reviewed records or interviews indicate the presence of elevated levels of heavy metals or natural asbestos in the area. In any event, even if these minerals were present at low concentrations in the sand and gravel at the site, they would represent a natural background condition as opposed to contamination.

As identified in Section 5.1 and in the EDR report in Appendix D, several other nearby sites have histories of environmental concerns from USTs or chemical spills. However, further review of records showing closure of these sites and both their distance and location downgradient topographically from the subject property indicate that none of them pose more than a low probability of impacting restoration activities.

The environmental database search did not produce any other evidence of sites posing potential of environmental impact to the subject property.

Similarly, the records review did not produce any other evidence of environmental concerns for the subject property.

---

1 DTSC Information Advisory – Clean Imported Fill Material. Available at: https://www.gsweventcenter.com/GSW_RTC_References/2001_10_CleanImportedFill.pdf
2 CA Department of Conservation – Areas More Likely to Contain naturally Occurring Asbestos. Available at: https://www.arb.ca.gov/toxics/asbestos/ofr_2000-019.pdf
As shown in Appendix C, the site visit did document some evidence of dumping of miscellaneous refuse onsite. However, the garbage dumped appeared to be limited to non-hazardous objects like furniture. No ground stains or odors were noted in the vicinity of the refuse. This type of dumping has little likelihood of posing environmental concerns.

Interviews conducted within the timeframe available for the assessment did not produce any specific additional environmental concerns regarding adjoining or nearby sites that were not already evident from the records review or site visit. The interview confirmed known uses on the subject property and adjoining properties. For example, a long history of agricultural activity in the area and surface water sewage contamination of the Tijuana River have reportedly occurred. However, the site’s distance and location upgradient topographically from these potential contamination sources keep the risk of impact to the subject property low.
9.0 Opinion

This section presents the opinion of the responsible environmental professional as to whether the environmental conditions summarized in Section 8 qualify as RECs at the present time. Section 11 presents the opinion of the responsible environmental professional as to the significance of deviations, if any, from Practice E 1527-13 to the conclusions of this Phase I ESA.

Historically, the primary activity on the subject property was sand and gravel mining. There is no indication of any releases of hazardous substances or petroleum-based products on the subject property; therefore, this does not create a significant environmental concern. It is the opinion of the responsible environmental professional that this environmental condition does not qualify as a REC at the present time.

It should also be noted that there are several sites with environmental concerns in relatively close proximity to the subject property. However, as discussed in previous sections, careful review of these sites indicates that, while they likely represent potential environmental concerns on their respective properties, it is judged unlikely that they pose more than a de minimis risk of impacting restoration areas. They are therefore not considered RECs for the project.
10.0 Conclusion

KES has performed a Phase I Environmental Site Assessment of the subject property in conformance with the scope and limitations of ASTM Practice E 1527-13. Any exceptions to, or deletions from, this practice are described in Section 11 of this report. This assessment has revealed no evidence of recognized environmental conditions in connection with the property.

11.0 Deviations

The following table lists any deviations, including additional scope items beyond those identified in the Practice, that pertain to this Phase I ESA.

14.0 Qualifications of Environmental Professional

Michael Wolff, P.G., C.E.G., R.E.A.

Education:

Professional Registrations:
  Registered Professional Geologist (PG Calif. #3347)
  Certified Engineering Geologist (CEG Calif. #970)

Experience Summary:

Mr. Wolff is a Registered Professional Geologist and Certified Engineering Geologist in California with 50 years of professional experience as an environmental and engineering geologist, and more than 35 years of professional experience as an environmental assessor. His experience includes a wide range of Phase I and II environmental assessments, preliminary endangerment assessments (PEAs), remediation projects, environmental due diligence projects, and engineering geology and construction support projects. In all, Mr. Wolff has performed or directed more than 50 Phase I Environmental Site Assessments and more than 300 Phase II site investigation and remediation projects at commercial/industrial and public sector sites.

Mr. Wolff has extensive experience in designing, implementing and managing a wide variety of environmental site assessment, remediation, and due diligence projects under diverse regulatory agency oversight situations. His experience has also been applied to the areas of regulatory negotiation, cleanup cost estimating, cost allocation for potentially responsible parties (PRPs), and litigation support. Mr. Wolff has provided expert testimony in environmental litigation cases.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA’s Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

### EDR HIGH RISK HISTORICAL RECORDS

**EDR Exclusive Records**

- EDR MGP: EDR Proprietary Manufactured Gas Plants
- EDR Hist Auto: EDR Exclusive Historical Auto Stations
- EDR Hist Cleaner: EDR Exclusive Historical Cleaners

**EDR RECOVERED GOVERNMENT ARCHIVES**

**Exclusive Recovered Govt. Archives**

- RGA LF: Recovered Government Archive Solid Waste Facilities List
SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in **bold italics** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

**Federal CERCLIS list**

SEMS: SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA’s Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the SEMS list, as provided by EDR, and dated 03/11/2019 has revealed that there is 1 SEMS site within approximately 0.5 miles of the target property.

<td>E 1/4 - 1/2 (0.493 mi.)</td>
<td>6</td>
<td>12</td>
</tr>
</tbody>
</table>

**Federal CERCLIS NFRAP site list**

SEMS-ARCHIVE: SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

A review of the SEMS-ARCHIVE list, as provided by EDR, and dated 03/11/2019 has revealed that there
**EXECUTIVE SUMMARY**

is 1 SEMS-ARCHIVE site within approximately 0.5 miles of the target property.

**State- and tribal - equivalent CERCLIS**

ENVIROSTOR: The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

A review of the ENVIROSTOR list, as provided by EDR, and dated 01/28/2019 has revealed that there is 1 ENVIROSTOR site within approximately 1 mile of the target property.

CPS-SLIC: Cleanup Program Sites (CPS; also known as Site Cleanups [SC] and formerly known as Spills, Leaks, Investigations, and Cleanups [SLIC] sites) included in GeoTracker. GeoTracker is the Water Boards data management system for sites that impact, or have the potential to impact, water quality in California, with emphasis on groundwater.

A review of the CPS-SLIC list, as provided by EDR, has revealed that there are 2 CPS-SLIC sites

**ADDITIONAL ENVIRONMENTAL RECORDS**

**Local Lists of Registered Storage Tanks**

SWEEPS UST: Statewide Environmental Evaluation and Planning System. This underground storage tank listing was updated and maintained by a company contacted by the SWRCB in the early 1990's. The listing is no longer updated or maintained. The local agency is the contact for more information on a site on the SWEEPS list.

A review of the SWEEPS UST list, as provided by EDR, and dated 06/01/1994 has revealed that there is 1 SWEEPS UST site within approximately 0.25 miles of the target property.

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

**Number of Days to Update:** Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

### STANDARD ENVIRONMENTAL RECORDS

#### Federal NPL site list

**NPL:** National Priority List
National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.
Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

Federal CERCLIS list

FEDERAL FACILITY: Federal Facility Site Information listing

A listing of National Priority List (NPL) and Base Realignment and Closure (BRAC) sites found in the Comprehensive Environmental Response, Compensation and Liability Information System (CERCLIS) Database where EPA Federal Facilities Restoration and Reuse Office is involved in cleanup activities.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly know as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive
SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA’s knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

**Federal RCRA non-CORRACTS TSD facilities list**

RCRA-TSDF: RCRA - Treatment, Storage and Disposal  
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

**Federal RCRA generators list**

RCRA-LQG: RCRA - Large Quantity Generators  
RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

ENVIROSTOR: EnviroStor Database
The Department of Toxic Substances Control’s (DTSC’s) Site Mitigation and Brownfields Reuse Program’s (SMBRP’s) EnviroStor database identifies sites that have known contamination or sites for which there may be reasons to investigate further. The database includes the following site types: Federal Superfund sites (National Priorities List (NPL)); State Response, including Military Facilities and State Superfund; Voluntary Cleanup; and School sites. EnviroStor provides similar information to the information that was available in CalSites, and provides additional site information, including, but not limited to, identification of formerly-contaminated properties that have been released for reuse, properties where environmental deed restrictions have been recorded to prevent inappropriate land uses, and risk characterization information that is used to assess potential impacts to public health and the environment at contaminated sites.

Data Release Frequency: Varies
VCP: Voluntary Cleanup Program Properties
Contains low threat level properties with either confirmed or unconfirmed releases and the project proponents have request that DTSC oversee investigation and/or cleanup activities and have agreed to provide coverage for DTSC’s costs.

Date of Government Version: 01/28/2019
Date Data Arrived at EDR: 01/29/2019
Date Made Active in Reports: 03/05/2019
Number of Days to Update: 35
Next Scheduled EDR Contact: 05/11/2019
Data Release Frequency: Quarterly

INDIAN VCP R7: Voluntary Cleanup Priority Listing
A listing of voluntary cleanup priority sites located on Indian Land located in Region 7.

Date of Government Version: 03/20/2008
Date Data Arrived at EDR: 04/22/2008
Date Made Active in Reports: 05/19/2008
Number of Days to Update: 27
Next Scheduled EDR Contact: 07/20/2009
Data Release Frequency: Varies

State and tribal Brownfields sites

BROWNFIELDS: Considered Brownfields Sites Listing
A listing of sites the SWRCB considers to be Brownfields since these are sites have come to them through the MOA Process.

Date of Government Version: 12/20/2018
Date Data Arrived at EDR: 12/21/2018
Date Made Active in Reports: 02/28/2019
Number of Days to Update: 69
Next Scheduled EDR Contact: 07/08/2019
Data Release Frequency: Quarterly

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites
Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

Date of Government Version: 12/17/2018
Date Data Arrived at EDR: 12/18/2018
Date Made Active in Reports: 01/11/2019
Number of Days to Update: 24
Next Scheduled EDR Contact: 07/01/2019

DEED: Deed Restriction Listing
Site Mitigation and Brownfields Reuse Program Facility Sites with Deed Restrictions & Hazardous Waste Management
Program Facility Sites with Deed / Land Use Restriction. The DTSC Site Mitigation and Brownfields Reuse Program
(SMBRP) list includes sites cleaned up under the program’s oversight and generally does not include current
or former hazardous waste facilities that required a hazardous waste facility permit. The list represents deed
restrictions that are active. Some sites have multiple deed restrictions. The DTSC Hazardous Waste Management
Program (HWMP) has developed a list of current or former hazardous waste facilities that have a recorded land
use restriction at the local county recorder’s office. The land use restrictions on this list were required by
the DTSC HWMP as a result of the presence of hazardous substances that remain on site after the facility (or
part of the facility) has been closed or cleaned up. The types of land use restriction include deed notice, deed
restriction, or a land use restriction that binds current and future owners.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated
RCRAInfo is EPA’s comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

Date of Government Version: 03/25/2019
Date Data Arrived at EDR: 03/27/2019
Date Made Active in Reports: 04/17/2019
Number of Days to Update: 21

FUDS: Formerly Used Defense Sites
The listing includes locations of Formerly Used Defense Sites properties where the US Army Corps of Engineers is actively working or will take necessary cleanup actions.

Date of Government Version: 01/31/2015
Date Data Arrived at EDR: 11/10/2006
Date Made Active in Reports: 01/11/2007
Number of Days to Update: 62

DOD: Department of Defense Sites
This data set consists of federally owned or administered lands, administered by the Department of Defense, that have any area equal to or greater than 640 acres of the United States, Puerto Rico, and the U.S. Virgin Islands.

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 02/06/2006
Date Made Active in Reports: 01/11/2007
Number of Days to Update: 339

FEDLAND: Federal and Indian Lands

Date of Government Version: 12/31/2005
Date Data Arrived at EDR: 02/06/2006
Date Made Active in Reports: 01/11/2007
Number of Days to Update: 339

SCRD DRYCLEANERS: State Coalition for Remediation of Drycleaners Listing
The State Coalition for Remediation of Drycleaners was established in 1998, with support from the U.S. EPA Office of Superfund Remediation and Technology Innovation. It is comprised of representatives of states with established drycleaner remediation programs. Currently the member states are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin.
US FIN ASSUR: Financial Assurance Information
All owners and operators of facilities that treat, store, or dispose of hazardous waste are required to provide proof that they will have sufficient funds to pay for the clean up, closure, and post-closure care of their facilities.

EPA WATCH LIST: EPA WATCH LIST
EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List
The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

TSCA: Toxic Substances Control Act
Toxic Substances Control Act. TSCA identifies manufacturers and importers of chemical substances included on the TSCA Chemical Substance Inventory list. It includes data on the production volume of these substances by plant site.

TRIS: Toxic Chemical Release Inventory System
Toxic Release Inventory System. TRIS identifies facilities which release toxic chemicals to the air, water and land in reportable quantities under SARA Title III Section 313.
SSTS: Section 7 Tracking Systems
Section 7 of the Federal Insecticide, Fungicide and Rodenticide Act, as amended (92 Stat. 829) requires all registered pesticide-producing establishments to submit a report to the Environmental Protection Agency by March 1st each year. Each establishment must report the types and amounts of pesticides, active ingredients and devices being produced, and those having been produced and sold or distributed in the past year.

ROD: Records Of Decision
Record of Decision. ROD documents mandate a permanent remedy at an NPL (Superfund) site containing technical and health information to aid in the cleanup.

RMP: Risk Management Plans
When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System
RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.
GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Telephone: 202-343-9775
Last EDR Contact: 04/02/2019
Next Scheduled EDR Contact: 07/15/2019
Data Release Frequency: Quarterly

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing
A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.
Date of Government Version: 10/19/2006
Date Data Arrived at EDR: 03/01/2007
Date Made Active in Reports: 04/10/2007
Number of Days to Update: 40

| US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS) | The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants. |
| Date of Government Version:     | 10/12/2016                                                                  |

| US MINES 2: Ferrous and Nonferrous Metal Mines Database Listing | This map layer includes ferrous (ferrous metal mines are facilities that extract ferrous metals, such as iron ore or molybdenum) and nonferrous (Nonferrous metal mines are facilities that extract nonferrous metals, such as gold, silver, copper, zinc, and lead) metal mines in the United States. |
GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

US MINES 3: Active Mines & Mineral Plants Database Listing
Active Mines and Mineral Processing Plant operations for commodities monitored by the Minerals Information Team of the USGS.

ABANDONED MINES: Abandoned Mines
An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FINDS: Facility Index System/Facility Registry System
Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

UXO: Unexploded Ordnance Sites
A listing of unexploded ordnance site locations

DOCKET HWC: Hazardous Waste Compliance Docket Listing
A complete list of the Federal Agency Hazardous Waste Compliance Docket Facilities.
ECHO: Enforcement & Compliance History Information
ECHO provides integrated compliance and enforcement information for about 800,000 regulated facilities nationwide.

Date of Government Version: 03/03/2019
Source: Environmental Protection Agency
Telephone: 202-564-2280
Last EDR Contact: 04/09/2019
Number of Days to Update: 27
Next Scheduled EDR Contact: 07/22/2019
Data Release Frequency: Quarterly

FUELS PROGRAM: EPA Fuels Program Registered Listing
This listing includes facilities that are registered under the Part 80 (Code of Federal Regulations) EPA Fuels Programs. All companies now are required to submit new and updated registrations.

Date of Government Version: 02/19/2019
Source: EPA
Telephone: 800-385-6164
Last EDR Contact: 02/21/2019
Number of Days to Update: 39
Next Scheduled EDR Contact: 06/03/2019
Data Release Frequency: Quarterly

CA BOND EXP. PLAN: Bond Expenditure Plan
Department of Health Services developed a site-specific expenditure plan as the basis for an appropriation of Hazardous Substance Cleanup Bond Act funds. It is not updated.

Date of Government Version: 01/01/1989
Source: Department of Health Services
Telephone: 916-255-2118
Last EDR Contact: 05/31/1994
Data Release Frequency: No Update Planned

CORTES: "Cortese" Hazardous Waste & Substances Sites List
The sites for the list are designated by the State Water Resource Control Board (LUST), the Integrated Waste Board (SWF/LS), and the Department of Toxic Substances Control (Cal-Sites).

Date of Government Version: 12/20/2018
Source: CAL EPA/Office of Emergency Information
Telephone: 916-323-3400
Last EDR Contact: 03/26/2019
Next Scheduled EDR Contact: 07/08/2019
Data Release Frequency: Quarterly

CUPA SAN FRANCISCO CO: CUPA Facility Listing
Cupa facilities

Date of Government Version: 09/11/2018
Source: San Francisco County Department of Environmental Health
Telephone: 415-252-3896
Last EDR Contact: 01/31/2019
Next Scheduled EDR Contact: 05/20/2019
Data Release Frequency: Varies

CUPA LIVERMORE-PLEASANTON: CUPA Facility Listing
list of facilities associated with the various CUPA programs in Livermore-Pleasanton

Date of Government Version: 01/23/2019
Source: Livermore-Pleasanton Fire Department
Telephone: 925-454-2361
Last EDR Contact: 02/26/2019
Next Scheduled EDR Contact: 05/27/2019
Data Release Frequency: Varies

DRYCLEAN AVAQMD: Antelope Valley Air Quality Management District Drycleaner Listing
A listing of dry cleaners in the Antelope Valley Air Quality Management District.
DRYCLEANERS: Cleaner Facilities
A list of drycleaner related facilities that have EPA ID numbers. These are facilities with certain SIC codes: power laundries, family and commercial; garment pressing and cleaner’s agents; linen supply; coin-operated laundries and cleaning; drycleaning plants, except rugs; carpet and upholster cleaning; industrial launderers; laundry and garment services.

EMI: Emissions Inventory Data
Toxics and criteria pollutant emissions data collected by the ARB and local air pollution agencies.

ENF: Enforcement Action Listing

Financial Assurance 1: Financial Assurance Information Listing
Financial assurance information

Financial Assurance 2: Financial Assurance Information Listing
A listing of financial assurance information for solid waste facilities. Financial assurance is intended to ensure that resources are available to pay for the cost of closure, post-closure care, and corrective measures if the owner or operator of a regulated facility is unable or unwilling to pay.
HAZNET: Facility and Manifest Data
Facility and Manifest Data. The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000 - 1,000,000 annually, representing approximately 350,000 - 500,000 shipments. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category, and disposal method. This database begins with calendar year 1993.

ICE: ICE
Contains data pertaining to the Permitted Facilities with Inspections / Enforcements sites tracked in Envirostor.

HIST CORTESE: Hazardous Waste & Substance Site List
The sites for the list are designated by the State Water Resource Control Board [LUST], the Integrated Waste Board [SWF/LS], and the Department of Toxic Substances Control [CALSITES]. This listing is no longer updated by the state agency.

HWP: EnviroStor Permitted Facilities Listing
Detailed information on permitted hazardous waste facilities and corrective action ("cleanups") tracked in EnviroStor.

HWT: Registered Hazardous Waste Transporter Database
A listing of hazardous waste transporters. In California, unless specifically exempted, it is unlawful for any person to transport hazardous wastes unless the person holds a valid registration issued by DTSC. A hazardous waste transporter registration is valid for one year and is assigned a unique registration number.
MINES: Mines Site Location Listing
A listing of mine site locations from the Office of Mine Reclamation.
Date of Government Version: 12/10/2018
Date Data Arrived at EDR: 12/12/2018
Date Made Active in Reports: 01/15/2019
Number of Days to Update: 34

WASTEWATER PITS: Oil Wastewater Pits Listing
Water officials discovered that oil producers have been dumping chemical-laden wastewater into hundreds of unlined pits that are operating without proper permits. Inspections completed by the Central Valley Regional Water Quality Control Board revealed the existence of previously unidentified waste sites. The water boards review found that more than one-third of the region's active disposal pits are operating without permission.

WDR: Waste Discharge Requirements Listing
In general, the Waste Discharge Requirements (WDRs) Program (sometimes also referred to as the "Non Chapter 15 (Non 15) Program") regulates point discharges that are exempt pursuant to Subsection 20090 of Title 27 and not subject to the Federal Water Pollution Control Act. Exemptions from Title 27 may be granted for nine categories of discharges (e.g., sewage, wastewater, etc.) that meet, and continue to meet, the preconditions listed for each specific exemption. The scope of the WDRs Program also includes the discharge of wastes classified as inert, pursuant to section 20230 of Title 27.
CIWQS: California Integrated Water Quality System
The California Integrated Water Quality System (CIWQS) is a computer system used by the State and Regional Water
Quality Control Boards to track information about places of environmental interest, manage permits and other orders,
track inspections, and manage violations and enforcement activities.

CERS: CalEPA Regulated Site Portal Data
The CalEPA Regulated Site Portal database combines data about environmentally regulated sites and facilities in
California into a single database. It combines data from a variety of state and federal databases, and provides
an overview of regulated activities across the spectrum of environmental programs for any given location in California.
These activities include hazardous materials and waste, state and federal cleanups, impacted ground and surface
waters, and toxic materials.

NON-CASE INFO: Non-Case Information Sites (GEOTRACKER)
Non-Case Information sites

WIP: Well Investigation Program Case List
Well Investigation Program case in the San Gabriel and San Fernando Valley area.

OTHER OIL GAS: Other Oil & Gas Projects Sites (GEOTRACKER)
Other Oil & Gas Projects sites

PROD WATER PONDS: Produced Water Ponds Sites (GEOTRACKER)
Produced water ponds sites

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants
The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants)
compiled by EDR’s researchers. Manufactured gas sites were used in the United States from the 1800’s to 1950’s
to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture
of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production,
such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds
are potentially hazardous to human health and the environment. The byproduct from this process was frequently
disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil
and groundwater contamination.

Data Release Frequency: No Update Planned

EDR Hist Auto: EDR Exclusive Historical Auto Stations
EDR has searched selected national collections of business directories and has collected listings of potential
gas station/filling station/service station sites that were available to EDR researchers. EDR’s review was limited
to those categories of sources that might, in EDR’s opinion, include gas station/filling station/service station
establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station,
filling station, auto, automobile repair, auto service station, service station, etc. This database falls within
a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents
unique and sometimes proprietary data about past sites and operations that typically create environmental concerns,
but may not show up in current government records searches.

Data Release Frequency: Varies
EDR Hist Cleaner: EDR Exclusive Historical Cleaners
EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR’s review was limited to those categories of sources that might, in EDR’s opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as “High Risk Historical Records”, or HRHR. EDR’s HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

Data Release Frequency: Varies
Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

**CT MANIFEST: Hazardous Waste Manifest Data**
- Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a TSD facility.

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:
Source: American Hospital Association, Inc.
Telephone: 312-280-5991
The database includes a listing of hospitals based on the American Hospital Association’s annual survey of hospitals.

Medical Centers: Provider of Services Listing
Source: Centers for Medicare & Medicaid Services
Telephone: 410-786-3000
A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes
Source: National Institutes of Health
Telephone: 301-594-6248
Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools
Source: National Center for Education Statistics
Telephone: 202-502-7300
The National Center for Education Statistics’ primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools
Source: National Center for Education Statistics

NELSON SLOAN QUARRY
SAN DIEGO, CA 92154

TARGET PROPERTY COORDINATES

Latitude (North): 32.541791 - 32° 32’ 30.45”
Longitude (West): 117.074369 - 117° 4’ 27.73”
Universal Tranverse Mercator: Zone 11
UTM X (Meters): 493016.9
UTM Y (Meters): 3600304.5
Elevation: 237 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map: 5622818 IMPERIAL BEACH, CA
Version Date: 2012

EDR’s GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.
GROUNDWATER FLOW DIRECTION INFORMATION
Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION
Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY
General Topographic Gradient: General NNE

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.
HYDROLOGIC INFORMATION
Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

HYDROGEOLOGIC INFORMATION
Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:
Search Radius: 1.25 miles
Status: Not found

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.
GROUNDWATER FLOW VELOCITY INFORMATION
Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY
Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture’s (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. The following information is based on Soil Conservation Service SSURGO data.

Soil Map ID: 1

Soil Component Name: OLIVENHAIN

Soil Surface Texture: cobbly loam

Hydrologic Group: Class D - Very slow infiltration rates. Soils are clayey, have a high water table, or are shallow to an impervious layer.

Soil Drainage Class: Well drained

Hydric Status: Not hydric

Corrosion Potential - Uncoated Steel: Moderate

Depth to Bedrock Min: > 0 inches

Depth to Watertable Min: > 0 inches

### Soil Layer Information

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)
- Source: United States Geologic Survey
  - EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map
- Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.
  - Source: FEMA
  - Telephone: 877-336-2627

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory
- Source: Department of Fish and Wildlife
- Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW Information System
- Source: EDR proprietary database of groundwater flow information
  - EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

STATSGO: State Soil Geographic Database
- Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
  - The U.S. Department of Agriculture’s (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database
- Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)
  - Telephone: 800-672-5559
  - SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.
LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750
Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data
Source: EPA/Office of Drinking Water
Telephone: 202-564-3750

USGS Water Wells: USGS National Water Inventory System (NWIS)
This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

STATE RECORDS

Water Well Database
Source: Department of Water Resources
Telephone: 916-651-9648

California Drinking Water Quality Database
Source: Department of Public Health
Telephone: 916-324-2319
The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

OTHER STATE DATABASE INFORMATION

California Oil and Gas Well Locations
Source: Department of Conservation
Telephone: 916-323-1779
Oil and Gas well locations in the state.

California Earthquake Fault Lines
Source: California Division of Mines and Geology
The fault lines displayed on EDR’s Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

RADON

State Database: CA Radon
Source: Department of Public Health
Telephone: 916-210-8558
Radon Database for California

Area Radon Information
Source: USGS
Telephone: 703-356-4020
The National Radon Database has been developed by the U.S. Environmental Protection Agency (USEPA) and is a compilation of the EPA/State Residential Radon Survey and the National Residential Radon Survey. The study covers the years 1986 - 1992. Where necessary data has been supplemented by information collected at private sources such as universities and research institutions.
EPA Radon Zones
Source: EPA
Telephone: 703-356-4020
Sections 307 & 309 of IRAA directed EPA to list and identify areas of U.S. with the potential for elevated indoor radon levels.

OTHER

Airport Landing Facilities: Private and public use landing facilities
Source: Federal Aviation Administration, 800-457-6656

Epicenters: World earthquake epicenters, Richter 5 or greater
Source: Department of Commerce, National Oceanic and Atmospheric Administration

California Earthquake Fault Lines: The fault lines displayed on EDR’s Topographic map are digitized quaternary fault lines, prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California’s Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

EXECUTIVE SUMMARY

DESCRIPTION

Environmental Data Resources, Inc.’s (EDR) City Directory Abstract is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR’s City Directory Abstract includes a search and abstract of available city directory data. For each address, the directory lists the name of the corresponding occupant at five year intervals.

Business directories including city, cross reference and telephone directories were reviewed, if available, at approximately five year intervals for the years spanning 1903 through 2014. This report compiles information gathered in this review by geocoding the latitude and longitude of properties identified and gathering information about properties within 660 feet of the target property.

A summary of the information obtained is provided in the text of this report.

RECORD SOURCES

EDR's Digital Archive combines historical directory listings from sources such as Cole Information and Dun & Bradstreet. These standard sources of property information complement and enhance each other to provide a more comprehensive report.

EDR is licensed to reproduce certain City Directory works by the copyright holders of those works. The purchaser of this EDR City Directory Report may include it in report(s) delivered to a customer. Reproduction of City Directories without permission of the publisher or licensed vendor may be a violation of copyright.

The EDR Property Tax Map Report
Environmental Data Resources, Inc.’s EDR Property Tax Map Report is designed to assist environmental professionals in evaluating potential environmental conditions on a target property by understanding property boundaries and other characteristics. The report includes a search of available property tax maps, which include information on boundaries for the target property and neighboring properties, addresses, parcel identification numbers, as well as other data typically used in property location and identification.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

EDR BUILDING PERMIT REPORT

About This Report

The EDR Building Permit Report provides a practical and efficient method to search building department records for indications of environmental conditions. Generated via a search of municipal building permit records gathered from more than 1,600 cities nationwide, this report will assist you in meeting the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

Building permit data can be used to identify current and/or former operations and structures/features of environmental concern. The data can provide information on a target property and adjoining properties such as the presence of underground storage tanks, pump islands, sumps, drywells, etc., as well as information regarding water, sewer, natural gas, electrical connection dates, and current/former septic tanks.

ASTM and EPA Requirements

ASTM E 1527-13 lists building department records as a "standard historical source," as detailed in § 8.3.4.7: “Building Department Records - The term building department records means those records of the local government in which the property is located indicating permission of the local government to construct, alter, or demolish improvements on the property.” ASTM also states that “Uses in the area surrounding the property shall be identified in the report, but this task is required only to the extent that this information is revealed in the course of researching the property itself.”

EPA's Standards and Practices for All Appropriate Inquires (AAI) states: "§312.24: Reviews of historical sources of information. (a) Historical documents and records must be reviewed for the purposes of achieving the objectives and performance factors of §312.20(e) and (f). Historical documents and records may include, but are not limited to, aerial photographs, fire insurance maps, building department records, chain of title documents, and land use records.”

Methodology

EDR has developed the EDR Building Permit Report through our partnership with BuildFax, the nation's largest repository of building department records. BuildFax collects, updates, and manages building department records from local municipal governments. The database now includes 30 million permits, on more than 10 million properties across 1,600 cities in the United States.

The EDR Building Permit Report comprises local municipal building permit records, gathered directly from local jurisdictions, including both target property and adjoining properties. Years of coverage vary by municipality. Data reported includes (where available): date of permit, permit type, permit number, status, valuation, contractor company, contractor name, and description.

Incoming permit data is checked at seven stages in a regimented quality control process, from initial data source interview, to data preparation, through final auditing. To ensure the building department is accurate, each of the seven quality control stages contains, on average, 15 additional quality checks, resulting in a process of approximately 105 quality control "touch points."

For more information about the EDR Building Permit Report, please contact your EDR Account Executive at (800) 352-0050.
A search of building department records was conducted by Environmental Data Resources, Inc (EDR) on behalf of Kroner Environmental Services on Apr 18, 2019.

**TARGET PROPERTY**

Nelson Sloan Quarry  
San Diego, CA  92154

**SEARCH METHODS**

EDR searches available lists for both the Target Property and Surrounding Properties.

ADJOINING PROPERTY DETAILS

The following Adjoining Property addresses were researched for this report. Detailed findings are provided for each address.

No Permits Found
GENERAL BUILDING DEPARTMENT CONCEPTS

- **ICC**: The International Code Council. The governing body for the building/development codes used by all jurisdictions who’ve adopted the ICC guidelines. MOST of the US has done this. Canada, Mexico, and other countries use ICC codes books and guides as well. There are a few states who have added guidelines to the ICC codes to better fit their needs. For example, California has added seismic retrofit requirements for most commercial structures.

- **Building Department (Permitting Authority, Building Codes, Inspections Department, Building and Inspections)**: This is the department in a jurisdiction where an owner or contractor goes to obtain permits and inspections for building, tearing down, remodeling, adding to, re-roofing, moving or otherwise making changes to any structure, Residential or Commercial.

- **Jurisdiction**: This is the geographic area representing the properties over which a Permitting Authority has responsibility.

- **GC**: General Contractor. Usually the primary contractor hired for any Residential or Commercial construction work.

- **Sub**: Subordinate contracting companies or subcontractors. Usually a “trades” contractor working for the GC. These contractors generally have an area of expertise in which they are licensed like Plumbing, Electrical, Heating and Air systems, Gas Systems, Pools etc. (called “trades”).

- **Journeymen**: Sub contractors who have their own personal licenses in one or more trades and work for different contracting companies, wherever they are needed or there is work.

- **HVAC (Mechanical, Heating & Air companies)**: HVAC = Heating, Ventilation, and Air Conditioning.

- **ELEC (Electrical, TempPole, TPole, TPower, Temporary Power, Panel, AMP Change, Power Release)**: Electrical permits can be pulled for many reasons. The most common reason is to increase the AMPS of power in an electrical power panel. This requires a permit in almost every jurisdiction. Other common reason for Electrical permits is to insert a temporary power pole at a new construction site. Construction requires electricity, and in a new development, power has yet to be run to the lot. The temporary power pole is usually the very first permit pulled for new development. The power is released to the home owner when construction is complete and this sometimes takes the form of a Power Release permit or inspection.

- **“Pull” a permit**: To obtain and pay for a building permit.

- **CBO**: Chief Building Official

- **Planning Department**: The department in the development process where the building /structural plans are reviewed for their completeness and compliance with building codes

- **Zoning Department**: The department in the development process where the site plans are reviewed for their compliance with the regulations associated with the zoning district in which they are situated.

- **Zoning District**: A pre-determined geographic boundary within a jurisdiction where certain types of structures are permitted / prohibited. Examples are Residential structure, Commercial/Retail structures, Industrial/Manufacturing structures etc. Each zoning district has regulations associated with it like the sizes of the lots, the density of the structures on the lots, the number of parking spaces required for certain types of structures on the lots etc.

- **PIN (TMS, GIS ID, Parcel#)**: Property Identification Number and Tax Map System number.

- **State Card (Business license)**: A license card issued to a contractor to conduct business.

- **Building Inspector (Inspector)**: The inspector is a building department employee that inspects building construction for compliance to codes.

- **C.O.**: Certificate of Occupancy. This is the end of the construction process and designates that the owners now have permission to occupy a structure after its building is complete. Sometimes also referred to as a Certificate of Compliance.
Permit Content Definitions

- Permit Number: The alphanumerical designation assigned to a permit for tracking within the building department system. Sometimes the permit number gives clues to its role, e.g. a "PL" prefix may designate a plumbing permit.

- Description: A field on the permit form that allows the building department to give a brief description of the work being done. More often than not, this is the most important field for EP's to find clues to the prior use(s) of the property.

- Permit Type: Generally a brief designation of the type of job being done. For example BLDG-RES, BLDG-COM, ELEC, MECH etc.

Sample Building Permit Data

Date: Nov 09, 2000
Permit Type: Bldg -
New Permit Number: 101000000405
Status: Valuation: $1,000,000.00
Contractor Company: OWNER-BUILDER
Contractor Name:

Description: New one store retail (SAV-ON) with drive-thru pharmacy. Certificate of Occupancy.
The EDR Environmental Lien and AUL Search Report provides results from a search of available current land title records for environmental cleanup liens and other activity and use limitations, such as engineering controls and institutional controls.

A network of professional, trained researchers, following established procedures, uses client supplied address information to:

- search for parcel information and/or legal description;
- search for ownership information;
- research official land title documents recorded at jurisdictional agencies such as recorders’ offices, registries of deeds, county clerks’ offices, etc.;
- access a copy of the deed;
- search for environmental encumbering instrument(s) associated with the deed;
- provide a copy of any environmental encumbrance(s) based upon a review of key words in the instrument(s) (title, parties involved, and description); and
- provide a copy of the deed or cite documents reviewed.

Thank you for your business.
Please contact EDR at 1-800-352-0050 with any questions or comments.

JAMES R. NELSON, Trustee

[Signature]
LOIS NELSON, Trustee

STATE OF CALIFORNIA  }  SS
COUNTY OF SAN DIEGO  

On 3-5-03, before me, the undersigned, a Notary Public in and for said State, personally appeared James R. Nelson & Lois Nelson.

Personally known to me (or proved to me on the basis of satisfactory evidence) to be the person(s) whose name(s) is/are subscribed to the within instrument and acknowledged to me that he/she/they executed the same in his/her/their authorized capacity(ies), and that by his/her/their signature(s) on the instrument the person(s), or the entity upon behalf of which the person(s) acted, executed the instrument.

WITNESS my hand and official seal.

[Signature]

FOR NOTARY SEAL OR STAMP

This is to certify that the interest in real property conveyed by the foregoing deed or grant to the County of San Diego, a political subdivision, is hereby accepted on behalf of the Board of Supervisors of said County of San Diego pursuant to authority conferred by Resolution of said Board adopted on January 7, 1992, and the Grantee consents to recordation thereof by its duly authorized officer.

Dated: 3/5/03

JOHN KROSS, Deputy Director
Real Estate Services Division
Department of General Services
This Conditional Use Permit is granted by the Planning Commission of The City of San Diego to Nelson & Sloan, a California Corporation, Owner/Permittee, under the conditions in Section 101.0506 of the Municipal Code of The City of San Diego.

1. Permission is granted to Owner/Permittee to operate the Border Area Borrow Pit for the extraction of approximately 7.5 million cubic yards of sand and gravel for a period of 20 years on 146.4 acres located on the south side of Monument Road between Hollister Street and Old Dairy Mart Road in the Border Highlands area, south of the Tia Juana River Valley, described as Portions of Sections 3, 10 and 11, T19S, R2W, SBBM, in the A-1-10 Zone.

2. The facility shall consist of the following:
   a. Sand and gravel borrow area;
   b. Accessory uses as may be determined incidental and approved by the Planning Director.

3. All operations shall be conducted in a safe and sanitary manner, so as not to endanger or damage any adjacent public or private property.

4. This Conditional Use Permit shall expire at Midnight, March 11, 2002.

5. This Conditional Use Permit shall be subject to review by the Planning Commission at the end of the first year of operation, and at one-year intervals, thereafter. This review is to determine if any additional conditions are necessary or existing conditions need to be amended.

6. The operation of the project shall be restricted between 6:00 a.m. to 7:00 p.m., Monday through Saturday. Operation of the project shall not be permitted on Sundays except for maintenance of the facility.

7. The Owner/Permittee must comply with APCD rules and regulations in effect and in force during the term of the Conditional Use Permit.
8. Within 90 days of the issuance of the permit, the property shall be provided with facilities approved by the San Diego Department of Public Health as follows:

a. Potable water supply.

b. Sanitary facilities, including toilet, hand-washing and sewage disposal for employees working on the premises. These facilities shall be installed in conformance with San Diego County Health Department regulations.

c. No plumbing or other installation shall be made that could cause pollution of the potable water supply due to an open or potential cross-connection or due to back-flow.

d. Any ponds or surface water shall be maintained in such a manner as to prevent the development of a pest nuisance.

9. All of the subject property shall be maintained at all times in a neat and orderly fashion free of junk, litter and debris.

10. The sand and gravel extraction and reclamation program shall meet all requirements of the United States Border Patrol.

11. A run-off, erosion and siltation control plan shall be prepared by a licensed engineer qualified in hydrology and hydraulics. This plan shall contain performance standards including: minimizing erosion on-site, controlling run-off on-site and preventing downstream erosion during the life of the extraction operation. This plan shall be submitted to the City Engineer for approval no later than 6 months following granting of the Conditional Use Permit.

12. The City of San Diego, in conjunction with all other interested agencies, shall closely monitor this CUP to ensure compliance with the provisions of all applicable local, state and federal requirements in order to minimize impacts on air and water quality in the Tia Juana River Valley.

13. A revised, detailed landscape plan shall be prepared by a licensed landscape architect, in coordination with the consulting biologist for the project, and approved by the Planning Director no later than 90 days following granting of the Conditional Use Permit. In addition to the plant list already submitted with the application, trees shall be added to help stabilize finished slopes. A planting program shall be indicated for all level pad areas except where affected by trucks and equipment. This revised landscape plan shall become a revised Exhibit "A" for this project.
14. Revegetation of the site shall include application of mulched top soil removed from the site prior to excavation and stockpiled and maintained for revegetation purposes. Mulched plant material shall be supplemented with a native plant mix as determined necessary by the consulting biologist. Plant material shall be applied to areas, on- and off-site, which are affected by the project, including both finished manufactured slopes and level pad areas.

15. Revegetation procedures acceptable to the Planning Director and the applicant shall be implemented in a reasonably timely fashion following the excavation of each such increment.

16. A temporary irrigation system and/or water trucks shall be used to maintain revegetated areas for at least a two-year period following application of plant material.

17. The site shall be posted to indicate that it is closed to all unauthorized off-road vehicle activity.

18. The applicant shall be required to identify archaeological, historical and paleontological sites. Those sites shall be studied, salvaged and/or preserved by qualified professionals prior to any extractive activities. Additionally, the City's Historical Site Board shall have the opportunity to evaluate the findings on these sites.

19. Grading (both interim and finished) shall meet the following standards.

   a. Clearing and grubbing prior to excavation shall be confined to the one phase being extracted.

   b. Removal of overburden prior to the one phase being extracted shall be minimized to the extent possible.

   c. Finished slopes shall be contour graded utilizing horizontal and vertical slope variations. Gradients of finished slopes will vary from 2:1 to 4:1.

   d. Transition points where finished slopes intersect shall be graded in such a way as to return the site to a natural appearance.

   e. Hillsides and manufactured slopes shall be stabilized to prevent landsliding.

20. Noise from the operation shall be mitigated by appropriate mounding and other noise barriers as required by the City Noise Abatement Officer.

21. All outdoor lighting shall be so shaded and adjusted that the light is directed to fall only on the same premises as light
sources are located. Outdoor lighting shall only be used during the permitted operating hours.

22. Dairy Mart Road shall be reconstructed for a 600-foot-length segment south of the existing concrete bridge at the Tia Juana River low-flow channel. This 600-foot segment shall be along the "New" Dairy Mart Road alignment. The reconstructed roadway shall be improved to a minimum 30-foot width centered on a 40-foot-wide graded way. This improvement shall consist of a Class II aggregate-base, heavy-duty road surface capable of carrying trucks and equipment used in this operation. A reconstruction plan for this roadway segment shall be submitted to the City Engineer in a timely fashion to enable the issuance of a permit for the reconstruction work no later than six months following the granting of this Conditional Use Permit. Subject to the foregoing, this plan shall meet the City Engineering and Development Department's reasonable requirements for a road surface, drainage, and other measures that may be required. Work required by this condition shall be completed no later than one year following the granting of this conditional use Permit. Following such time as the City has caused the embankment and road to be satisfactorily protected against flood damage through rip-rap and armoring, at no expense to applicant, the applicant shall resurface the above 600-foot roadway segment with asphalt.

23. During the life of the Conditional Use Permit, the applicant shall be responsible for maintaining a portion of Monument Road described as: Commencing at the intersection of Monument and "New" Dairy Mart roads, thence southerly along Monument Road, a distance of approximately 700 feet, terminating at the entrance to the applicant's site. Additionally, the applicant shall be responsible for maintaining a portion of "New" Dairy Mart Road described as: Commencing at the intersection of "New" Dairy Mart Road, a distance of approximately 2,380 feet to the southerly abutment of the low-flow channel concrete bridge on "New" Dairy Mart Road. When other applicants are granted similar conditional use permits for the extraction of sand and gravel in the Border Highlands portion of the Tia Juana River Valley Planning Area, or other areas adjacent to the Border Highlands, applicant's responsibility to maintain the above portions of Monument and "New" Dairy Mart Roads shall diminish (in accordance with an as-yet-to-be-determined formula) to applicant's fair and equitable share based upon its level of use. The maintenance obligations contained in this paragraph shall in no event be deemed to require applicant to engage in major repairs of paved roadway, exclusive of the 600-foot section described in Condition 22 prior to its being paved, resulting primarily from unusual flooding or other Acts of God beyond applicant's reasonable control.

24. Any portion of Monument Road used by trucks and equipment by this Permittee shall be widened by dedication and improved to the satisfaction of the City Engineer.
25. The applicant shall meet with City Engineering staff on or about April 1 of each year during the life of the Conditional Use Permit to review the road condition and to reasonably determine the necessary maintenance to ensure that continued operation of the above-described portions of "New" Dairy Mart Road and Monument Road.

26. All candidate findings enumerated in the EIR shall be incorporated as part of this Conditional Use Permit.

27. No permit for any facility shall be granted nor shall any activity authorized by this permit be conducted on the premises until:
   
   a. The Permittee signs and returns the permit to the Planning Department.
   
   b. The Conditional Use Permit is recorded in the office of the County Recorder.

   If the signed permit is not received by the Planning Department within 90 days of the Planning Commission decision or within 30 days of a City Council decision, the permit shall be void.

28. Before issuance of any building permits, complete grading and building plans shall be submitted to the Planning Director for approval. Plans shall be in substantial conformity to Exhibit "A" dated March 11, 1982, on file in the office of the Planning Department. No change, modifications or alterations shall be made unless appropriate applications for amendment of this permit shall have been granted.

29. Before issuance of any grading or building permits, a complete landscape plan, including irrigation, shall be submitted to the Planning Director for approval. The plans shall be in substantial conformity to the Revised Exhibit "A" indicated in Condition 13. Such planting shall not be modified or altered unless this permit has been amended.

30. This Conditional Use Permit must be used within 18 months after the date of City approval or the permit shall be void. An Extension of Time may be granted as set forth in Section 101.0506 and 101.0507 of the Municipal Code.

31. Construction and operation of the approved use shall comply at all times with the regulations of this or any other governmental agencies.

32. After establishment of the project, the property shall not be used for any other purposes unless:
   
   a. Authorized by the Planning Commission; or
b. The proposed use meets every requirement of the zone existing for the property at the time of conversion; or

c. The permit has been revoked by the City.

33. This Conditional Use Permit may be revoked by the City if there is a material breach of default in any of the conditions of this permit. A revocation may be requested by the Permittee. Revocation of this Conditional Use Permit may be initiated by the City or the Permittee. The Planning Director shall set the revocation for a public hearing before the Planning commission, as provided in Section 101.0506 or 101.0507. An appeal from the decision of the Planning Commission may be taken to the City Council within ten days after the decision is filed with the City Clerk. The Clerk shall set this matter for a public hearing before the City Council as provided in Section 101.0506 or 101.0507.

34. This Conditional Use Permit is a covenant running with the lands and shall be binding upon the Permittee and any successor or successors, and the interests of any successor shall be subject to each and every condition set out.

35. Dairy Mart Road, "New" Dairy Mart Road, and the 700-foot section of Monument Road, described in Condition 23, shall be considered to be the prime arterial road accessing this facility. All heavy truck traffic destined to or away from the site shall be restricted to this arterial road to the I-5 Interchange. This restriction shall not apply to customer deliveries in the local area and equipment involving repair to the arterial road. Special permission may be granted by the City Engineer for other routes on a temporary basis for limited periods of time based upon unusual circumstances existing in the vicinity.

PASSED AND ADOPTED ON March 11, 1982
CONCLUSIONS:

The proposed project would not result in any significant unmitigated environmental impacts. Mitigation measures have already been incorporated into the project or are proposed by the applicant to adequately reduce impacts to visual quality/landform alteration, air quality, and water quality. The project would not have a significant impact on biological or archaeological resources.

MITIGATION MEASURES INCORPORATED INTO THE PROJECT:

*Visual Quality/Land Form Alteration: A reclamation plan has been prepared for the project site. Implementation of the plan following excavation activities would be a condition of the Conditional Use Permit and would adequately mitigate impacts to visual quality/landform alterations.

*Air Quality: The project would require a permit from the Air Pollution Control District. The conditions of the permit would identify measures necessary to mitigate air quality impacts. The applicant would implement several measures in order to minimize impacts to air quality. These measures would include dust proofing access and operating roads, surface watering of material and trucks prior to departure from the site to minimize dust generation in transport, and the application of other dust control measures as necessary to any dust producing condition.

*Water Quality: The project will require a permit from the California Regional Water Quality Control Board. Conditions of that permit would mitigate water quality impacts. Implementation of erosion control measures are also incorporated into the project to minimize erosion. Erosion control measures would include construction of temporary check dams during the life of the project to prevent runoff from leaving the site uncontrolled into the Tia Juana Valley, planting of all slopes with a native plant mix, and confining clearing and grubbing prior to excavation to approximately 3 acres per phase.

Nick Osler, Senior Planner
Planning Department

Sue Blackman, Secretary to the
Planning Commission

STATE OF CALIFORNIA)
COUNTY OF SAN DIEGO) ss.

On this 13th day of April, 1982, before me, the undersigned, a Notary Public in and for said County and State, personally appeared NICK OSLER, known to me to be a senior planner of The City of San Diego Planning Department, and SUE BLACKMAN, known to me to be the secretary to the Planning Commission of The City of San Diego, and known to me to be the persons whose names are subscribed to the within instrument, and acknowledged that they executed the same.

IN WITNESS WHEREOF, I have hereunto set my hand and official seal, in the County of San Diego, State of California, the day and year in this certificate first above written.

Catherine L. Meyer
Notary Public in and for the County of San Diego, State of California
ACKNOWLEDGED:

The undersigned "Owner/Permittee" by execution hereof agrees to each and every condition of this permit and promises to perform each and every obligation of Permittee hereunder.

NELSON & SLOAN
A California corporation
"Owner/Permittee"

DATE ISSUED: March 5, 1982
REPORT NO. 82-090

SUBJECT: CONDITIONAL USE PERMIT 497-PC to allow for sand and gravel extraction for a period of 20 years on a 146.4-acre site.

DESCRIPTION: Located on the south side of Monument Road between Old Dairy Mart Road and Hollister Street. Portion of Sections 3, 10 and 11, T19S, R2W, SBBM. A-1-10 Zone. Applicant: Nelson & Sloan. Tia Juana River Valley Plan, Local Coastal Program Addendum; Border Highlands Local Coastal Program Land Use Plan

REFERENCE: This item was continued from the Planning Commission agendas of February 4 and 11, 1982.

SUMMARY:

Issue - Should the Planning Commission approve the requested Conditional Use Permit and Reclamation Plan to allow for sand and gravel extraction for a period of 20 years on a 146.4-acre site?

Department Recommendation - APPROVE, with conditions, because the required Findings of Fact can be met.

Fiscal Impact - None

Environmental Impact - Environmental Impact Report No. 76-09-29 has been prepared for this project. The environmental impact report indicates that the project would not result in any significant unmitigated environmental impacts. Please see Attachment 2 (Conclusions and Mitigating Measures).

THESE RECOMMENDATIONS ARE BASED ON INFORMATION AVAILABLE AT THE TIME OF THIS REPORT.
BACKGROUND:
The 146.4-acre property is located in the Border Highlands area, on the south side of Monument Road between Old Dairy Mart Road and Hollister Street. The site consists of coastal highlands up to 425 feet in elevation, with finger canyons extending north, down to the Tia Juana River Valley. The site is vacant except for an existing sand and gravel extraction operation, located in the southeastern portion of the site. This activity is operating without benefit of a conditional use permit.

Surrounding property includes undeveloped Smuggler's Gulch, Spooner Mesa and Goat Canyon, located to the west, in the A-1-10 Zone. Agriculture, horse stables, several residences and a dairy are located to the north and east, in the A-1-10 and A-1-1 zones. The Mexican Border and Urban Tijuana are located to the south. The San Ysidro community is located approximately three miles to the east.

Minor extraction activity has been occurring on the site since the 1930's. A conditional use permit was granted in 1959 for a portion of the site. This permit expired in 1964. After being informed of the violation, the applicant submitted a conditional use permit application.

During the processing of the environmental report and the conditional use permit, the Tia Juana River Valley Plan, Local Coastal Program Addendum (LCPA) was being processed. The California State Coastal Commission certified the LCPA in September 1979, with the exception of the Border Highlands area. The Tia Juana River Valley Plan designates the Highlands east of Smuggler's Gulch for "commercial-recreation" use. However, the Coastal Commission recognized that the Border Highlands area also represents a major sand and gravel resource. In order to resolve this apparent conflict, the Coastal Commission recommended that a precise land use plan be developed for the Border Highlands/Spooner Mesa area as part of the Local Coastal Program Addendum. This precise plan would provide specific guidelines for the phased extraction and reclamation of sand and gravel resources in the Border Highlands area.

Preparation of the Border Highlands Local Coastal Program Land Use Plan (Precise Plan) began in January 1980, and was completed in February 1981. It was approved by the Planning Commission in March 1981, and by the City Council in April 1981. It received conditional certification by the Coastal Commission in July 1981.
ANALYSIS:

The applicant is proposing to extract approximately 7.5 million cubic yards of sand and gravel from the site, over a 20-year period. The landform would be transformed from its present configuration into two artificial terraces. One would be a 60.1-acre level pad at an elevation of about 128 feet, located in the central portion of the site. A second terrace, located in the western portion of the site, would consist of 27.3 acres at an elevation of about 328 feet. About 10 acres of this westerly terrace is proposed to be daylighted off-site. The CONROCK and Fenton Companies, which are also engaged in sand and gravel extraction activities, own some of the properties to the west. Although these adjacent properties are not now used for extraction, the applicant for this project indicates that the proposed off-site grading is intended to blend in with future extraction activities on these sites.

The two finished terraces are proposed to be connected by an internal haul road up to a width of 50 feet, at a grade not to exceed 12.5 percent. This haul road would parallel the south property line about 200 feet north of the Mexican Border and would exit the property to the east at Monument Road.

Three finished cut slopes are proposed with a maximum gradient of 2:1. The largest is proposed to parallel the Mexican Border and face northward. It would extend about 6,300 feet from east to west. The top of the slope is proposed to be 50 feet distant from the border. Maximum height of this slope would be approximately 200 feet.

A second cut slope, facing to the east, would separate the two finished terraces in the west-central portion of the site. This slope would have a maximum height of about 150 feet and a length of about 1,300 feet.

The third cut slope would border the 60.1-acre terrace on the north. This south-facing slope would be about 25 feet high throughout its 5,000-foot length. This south-facing cut slope is intended to buffer the operation from view along Monument Road. However, the two north-facing cut slopes would still be highly visible to residents of San Ysidro and the Otay Mesa-Nestor communities.

The applicant proposes to phase the extraction and reclamation operation in three-acre increments progressing generally from east to west. The process would include: 1) clearing vegetation and overburden from the deposit; 2) extracting and transporting the material; 3) grading and revegetating the finished slopes.
The applicant proposes to continue transporting the material to an existing processing plant located in the Otay River Valley (County), about four miles northeast of the project site. The transport route currently in use is via Monument Road to "New" Dairy Mart Road, then north on Beyer Boulevard to Main Street in the County. Interstate 5 between Dairy Mart Road and Main Street is an alternative to the Beyer Boulevard segment.

Landscaping for finished slopes would be from stockpiled materials removed from the site. Prior to grading an area, native plant materials growing on site would be salvaged and stockpiled. They would be maintained in a moist condition. When slopes are final graded, they would be scarified to a depth of 4 to 6 inches. Water would be applied to slopes by water truck spray, from 24 to 48 hours prior to application of the stockpiled mulch. The stockpiled mulch would be spread and lightly compacted on the slopes. The plantings would be water truck sprayed weekly until the landscaping is established. Final slopes would be maintained with additional mulch applications, if required, for two growing seasons. Initial mulch applications would be placed on the finished slopes between October and December of each year to take advantage of rainfall.

Flat pad areas are not proposed for landscaping as they would be continually traversed by trucks and equipment.

The United States Border Patrol uses an easement averaging 60 feet in width along the Mexican Border for use as a patrol road. They prefer low growing plant materials that would not severely restrict their surveillance of the border.

The Planning Department recommends approval of the CUP subject to conditions because the following Findings of Fact can be met for granting approval.

**FINDINGS OF FACT:**

1. The proposed use will not adversely affect the neighborhood nor the Tia Juana River Valley Plan, Local Coastal Program Addendum; and will not be detrimental to the health, safety and general welfare of persons living or working in the area. The Border Highlands/Spooner Mesa area has been identified as a significant sand and gravel resource. A sand and gravel operation is an appropriate interim use until the subject property is prepared for eventual commercial-recreation use as designated in the Community Plan and Local Coastal Program Addendum. The Department believes that the proposed project is an appropriate interim use in this area for the next 20 years.
2. The proposed use will comply with all the relevant regulations in the Municipal Code. Section 101.0506 of the Municipal Code of San Diego, Paragraph A.9., grants the Planning Commission authority, subject to appropriate conditions, to approve natural resources development and utilization in any zone by a conditional use permit. Section 101.0506.1 of the Municipal Code of San Diego outlines the requirements for processing conditional use permits and reclamation plans for natural resources development. The Planning Department believes that appropriate conditions exist in this case to grant the permit.

Conclusions and Mitigation Measures
PLANNING COMMISSION RESOLUTION NO. 3752
GRANTING CONDITIONAL USE PERMIT NO. 497

WHEREAS, NELSON & SLOAN, a California corporation, "Owner/Permittee," filed an application for a conditional use permit to allow sand and gravel extraction for a period of twenty years on a 146.4-acre site located on the south side of Monument Road, between Old Dairy Mart Road and Hollister Street, described as a Portion of Sections 3, 10 and 11, T19S, R2W, SBBM, in the A-1-10 zone; and

WHEREAS, on March 11, 1982, the Planning Commission of The City of San Diego considered Conditional Use Permit No. 497, pursuant to Section 101.0506 of the Municipal Code of The City of San Diego, and received for its consideration documentary, written and oral testimony and heard from all interested parties present at the public hearing; NOW, THEREFORE,

BE IT RESOLVED by the Planning Commission of The City of San Diego as follows:

1. That the Planning Commission adopts as the findings of the Planning Commission those written findings set for in Planning Report No. 82-090, dated March 5, 1982, and found beginning at Page 4 of said report, a copy of which is attached hereto and by this reference incorporated herein.

2. That said findings are supported by the minutes, maps and exhibits, all of which are herein incorporated by reference.

BE IT FURTHER RESOLVED that, based on the findings hereinbefore adopted by the Planning Commission, Conditional Use Permit No. 497 is hereby GRANTED to Owner/Permittee in the form and with the terms and conditions set forth in Conditional Use Permit No. 497, a copy of which is attached hereto and made a part hereof.

Sue Blackman
Sue Blackman, Secretary to the
Planning Commission
